# How to print and fold this zine

IF THE ZINE IS DOUBLE SIDED, START WITH STEP ONE.
IF NOT, START WITH STEP 2.

1. Print the zine file double-sided. Make sure "flip on short edge" is selected, otherwise the reverse pages will be upside-down.

2 (optional). For a cleaner fold, trim the white printer margins off the paper.

3. Fold and unfold the page in half the long way (hotdog style), then fold and unfold in half the short way (hamburger style). Fold and unfold both short edges to meet the center fold. Fold in half hamburger style and cut halfway down the center fold. Unfold, refold hotdog style, and push the outer panels together to create a diamond-shaped opening in the middle. Fold the pages together like a book, with the cover on the outside, and voila, you're done!
